

International Council of Associations for Science Education

The background of the cover is a large, stylized globe in shades of red and white. The globe shows the continents and is overlaid with a grid of latitude and longitude lines. The colors are muted, with the oceans appearing in a darker red and the continents in a lighter, almost white tone.

Science Education International is the quarterly journal of the International Council of Associations for Science Education (ICASE). ICASE was established in 1973 to extend and improve education in science for all children and youth by assisting member associations throughout the world.

This journal provides a means for associations, institutions, centres, foundations, companies, and individuals concerned with science education to share perspectives, concerns, ideas, and information that will foster cooperative efforts to improve science education, and which will serve as a chronicle of the advancement of science education throughout the world.
